Subject: From Shalom Global Warming /Climate Change Free film

This is a beautiful full feature film on the reality of global warming. It contains vital information as well as signs of hope and change. It has a limited showing that can be viewed on your computer at the link below.

Arlene

Available for a short time.

Before the Flood

In connection with national Geographic, Leonardo di Caprio (US actor) made a film outlining what is happening with climate change, the arguments of those denying it and the reasons behind them, and what may need to happen to slow

it down. As we approach the time for the next Climate Summit we need to take this seriously. It is difficult to watch but very worthwhile. You can watch it for a limited time at <https://youtu.be/90CkXVF-Q8M>
